

MainModule::refresh  
\_FiveSec

MainModule::refresh  
\_QuarterHour

MainModule::reportToGoogle  
SheetsTrigger

```
graph LR; A["MainModule::refresh  
_FiveSec"] --> C["MainModule::reportToGoogle  
SheetsTrigger"]; B["MainModule::refresh  
_QuarterHour"] --> C;
```

The diagram illustrates a dependency or call relationship. On the left, there are two white rectangular boxes. The top box contains the text 'MainModule::refresh' followed by '\_FiveSec' on a new line. The bottom box contains 'MainModule::refresh' followed by '\_QuarterHour' on a new line. On the right, there is a gray rectangular box containing the text 'MainModule::reportToGoogle' followed by 'SheetsTrigger' on a new line. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both refresh methods trigger the reportToGoogle function.
